

model-card:ncd-diabetes:client-manifest-current:v1

Diabetes

This model card describes the current client-manifest disease model and its component boundaries for assurance work.

Identity

Model id	01K2GJSGDYMQA19727Z9F2FSH8
Composition record	composition:ncd-diabetes:client-manifest-current:v1
Runtime	2025-2046; synchronous iterations 10
Signature	25433eb7734c34a692a988ff1c407c87d76f3216e186179cf361326788d2589d
Components	

Component	Mode	Role
Demographic substrate	compiled_together_current_graph	Population substrate
Disease epidemiology core	compiled_together_current_graph	Disease state and transfer mechanics
Burden metrics	compiled_together_current_graph	Healthcare output metrics
Economic metrics	downstream_metric_current_graph	Economic output metrics
Tobacco Risk Factor	link_then_inject_bundle_candidate	Healthcare output metrics
Alcohol Risk Factor	link_then_inject_bundle_candidate	Healthcare output metrics
Physical Inactivity Risk Factor	link_then_inject_bundle_candidate	Healthcare output metrics
Dietary Risk Factor	link_then_inject_bundle_candidate	Healthcare output metrics
Clinical Foot Care	compiled_together_current_graph	Clinical intervention
Clinical Retinopathy Screening	compiled_together_current_graph	Clinical intervention
Clinical Standard Glycaemic Control	compiled_together_current_graph	Clinical intervention
Clinical Intensive Glycaemic Control	compiled_together_current_graph	Clinical intervention
Clinical Nephropathy Screening	compiled_together_current_graph	Clinical intervention

Limits

The card describes the current executable disease model and component records. Most components are current in-graph boundaries, not independently executable modules yet. The demographic model is not included in this disease-model assurance registry.
