Clinical Intervention - Diabetes Foot Care

Comprehensive foot care intervention to prevent lower extremity amputations in people with diabetes. This intervention reduces progression from diabetes to lower extremity amputation by providing educational programs, access to appropriate footwear, and multidisciplinary clinic care. Neuropathy screening identifies at-risk individuals with diabetic nerve damage who require enhanced foot care.

Scope

This is a manifest-level scenario card. If the scenario file contains a Country value, that value is the scenario authoring default; the run certificate records the countries actually materialised and executed. **Scenario Parameters**
