Clinical Intervention - Diabetic Nephropathy Screening

Comprehensive blood pressure control intervention for people with diabetes to prevent cardiovascular and microvascular complications. This intervention reduces progression from diabetes to diabetic nephropathy and other cardiovascular complications by providing regular blood pressure monitoring, antihypertensive medications, and nephropathy screening. Nephropathy screening identifies diabetic patients with early kidney damage who require enhanced blood pressure control.

Scope

This is a manifest-level scenario card. If the scenario file contains a Country value, that value is the scenario authoring default; the run certificate records the countries actually materialised and executed. **Scenario Parameters**
