Appendix 3 - Physical Inactivity P2 Scenario

Physical activity awareness intervention that increases coverage of mass media campaigns. This scenario modifies coverage parameters from baseline to target levels over a specified scale-up period. The intervention reduces prevalence of physical inactivity, which changes the population attributable fraction and subsequently affects diabetes incidence rates.

Scope

This is a manifest-level scenario card. If the scenario file contains a Country value, that value is the scenario authoring default; the run certificate records the countries actually materialised and executed. **Scenario Parameters**
